

Priscila Ferrand, RNFA
Skin Care Specialist
Nurse Injector
480-767-7700
10210 N 92nd Street, Suite 200
Scottsdale AZ 85258

Women over the age of 30 (and especially here in Arizona's dry climate), should be under the care of a skin care specialist.

Priscila Ferrand is a Registered Nurse who has practiced in Scottsdale, Arizona, since 1984. A member of the American Society of Plastic and Reconstructive Skin Care Nurses, she specializes in a variety of non-invasive anti-aging treatments customized to fit your age specific needs, ranging from prevention to intervention. These procedures require no downtime and are quick, safe and very affordable.

Services include:

Botox/Dysport:

To smooth out and relax facial muscles such as crow's feet, frown, laugh and forehead lines. There is no downtime required and results are visible within 48 hours to 2 weeks after injections.

Dermal Fillers:

To enhance the size of your lips and/or correct shallow to deep facial wrinkles and lines on your face using Juvederm Ultra, Ultra Plus, Restalyne, Perlane or Sculptra.

Alpha and Beta Hydroxyl Peels:

These include Micropeel, Micropeel Plus, Pumpkin Peel or a PCA Peel. Not as harsh as Laser or heavy chemical peels, these treatments rejuvenate your skin by exfoliating dead cells while at the same time promoting growth of new cells and healthy collagen.

Post-Surgical Dermabrasion skin care:

Following your surgical dermabrasion, treatments are started to help reduce hyper-pigmentation and allow you to resume normal activities as quickly as 2 weeks post op.

Application of mineral make-up:

This can serve to camouflage acne, rosacea, bruising, hyper-pigmentation and dermabrasion.

HCG weight loss program:

HCG stands for human chorionic gonadotropin which is a hormone produced by pregnant women during the beginning stages of pregnancy. When taken, it is thought to help the body metabolize fat and allows dieters to be fulfilled by a low-calorie diet, which is part of the regimen.
